DETAILED ACTION

1. Applicant's Application filed on September 12, 2003 has been reviewed.
2. Claims 1-30 are presented for examination.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-6, 7-17 and 20-30, drawn to an apparatus or steps of manipulating document repository by determining a level of similarity between two discrete elements stored in the document repository.

Group II: Claims 18-19, drawn to steps of analyzing a document based on an associated physical structure and logical structure.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as manipulating document repository by determining a level of similarity between two discrete elements stored in the document repository and invention Group II drawn to steps of analyzing a document based on an associated physical structure and logical structure. See M.P.E.P.

§ 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
